

Parts Cart Upgrade

Reduce the risk of contaminated, damaged, and lost parts with a parts cart. Recommended for each filler, the parts cart holds parts during changeover or cleaning. The cart is made of stainless steel and is mounted on casters. An optional locking toolbox can be added to the cart.

Benefits:

- Prevention of lost parts
- Prevention of damaged parts
- Prevention of contaminated parts (parts are kept away from possible floor contamination)
- Efficient spare parts storage
- The heavy duty parts cart is ideal to keep change parts close at hand and to speed up assembly and disassembly operations
