Produces

ITALIAN **HEART** OF VACUUM PACKING MACHINE

Founded in 1966 by Arturo Saccardo, currently managed and operated by his son **Walter**, who, **since 1991**, has given the company a strong boost internationalization.

Saccardo Arturo

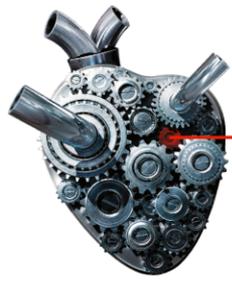

Saccardo Walter

ITALIAN **HEART** OF VACUUM PACKING MACHINE

The company deals with the design and
production of vacuum packaging machines
and bagging plants
for the food industry

ITALIAN **HEART** OF VACUUM PACKING MACHINE

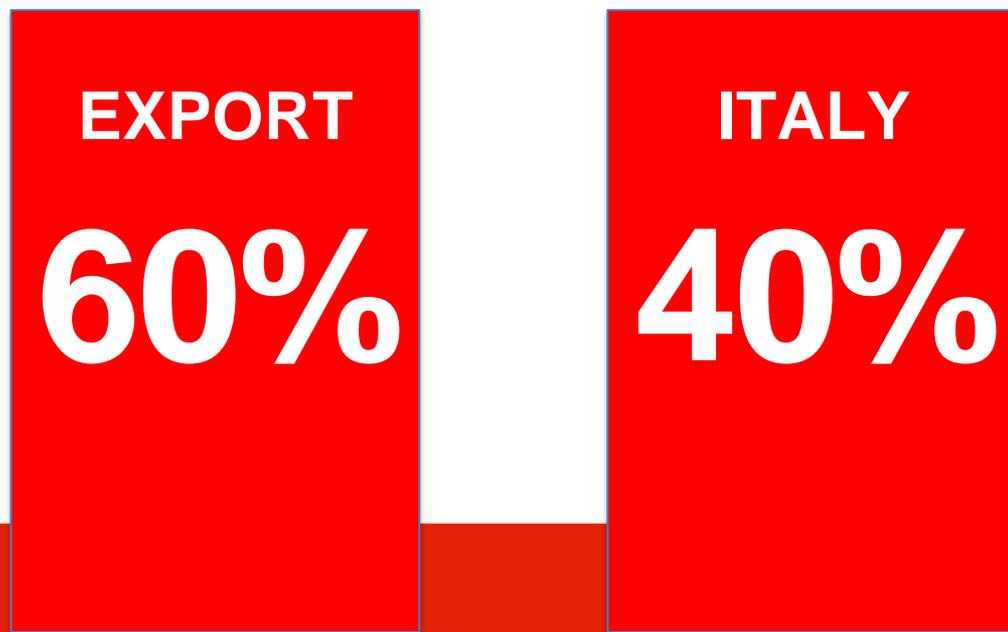

From **1966 to 1991** the production of **packaging machines** is finalized to the Internal Market

ITALIAN **HEART** OF VACUUM PACKING MACHINE

Since **1991**, under the direction of **Walter Saccardo** the company increased exports in emerging markets becoming a **reference point in the industry at the international level**

ITALIAN **HEART** OF VACUUM PACKING MACHINE

With an excellent annual capacity of production
Saccardo packaging machines realized
from **1966 to now** over

**20.000 machines
and plants for packaging**

ITALIAN **HEART** OF VACUUM PACKING MACHINE

Our target markets:

**EUROPE:
ITALY-FRANCE-BELGIUM-NETHERLANDS-
AUSTRIA-SPAIN-POLAND**

**ASIA:
RUSSIA-KAZHAKHSTAN-LITHUANIA**

NORTH AMERICA

**CENTRAL AND SOUTH AMERICA:
MEXICO-BRAZIL-COLOMBIA**

AUSTRALIA-NEW ZEALAND

Our work system

- Examination and collection of data on the product to be packed
- Analysis of the packaging process
- Preparation of the project
- Definition of the project
- Economic analysis
- Acceptance
- Production
- Test at our company
- Delivery and testing at the plant of customer
- Training of staff

Services & Support

- **Advice** and analysis of the dynamics of production and optimization of the packaging process
- **Custom Design** on specific customer requirements
- **Tailored production** for small and large plants
- **Technical testing** system Duo-Control
- **Service Line** with dedicated line
- **Spare Parts:** big warehouse for spare parts always available

ITALIAN **HEART** OF VACUUM PACKING MACHINE

Belt line
AS38-1500 y 1000

**automatic vacuum
packaging machine to
HIGH PRODUCTIVITY**

Work in Full autonomy with
preformed bags, welding **all
types of food bags on the
market.** PA - PE - Shrink - Coupled

Designed for the industry of fresh or
processed meat, cheese

ITALIAN **HEART** OF VACUUM PACKING MACHINE

Characteristics and strengths line AS38

- **FAST**

Productivity with performance up to 3.3 cycles / min.
Belt speed 90 M / Min - 1.5 M / Sec

- **CUSTOMIZABLE**

Maximum customization and adaptability to your product with over 100 possible configurations. Fully managed by PLC

- **VERSATILE**

Welding easily adjustable to the closing of each type of bag for food use, shrink and not shrink

- **FLEXIBLE**

Maximum adaptability of insertion in the production chain by using a single or double operator, or automatic-loading

- **CLEAN**

Cleaning quick and easy: thanks to the delicate button that allows the loosening of the belt automatically and the opening of the panels sensorized without the use of any tools

- **COMPONENTS OF HIGH QUALITY**

Festo pneumatic - Siemens Electronics - PLC Allen Bradley

- **CONNECTED**

Connection (also Wi-Fi) to the company network for monitoring status, productivity and diagnostic functions

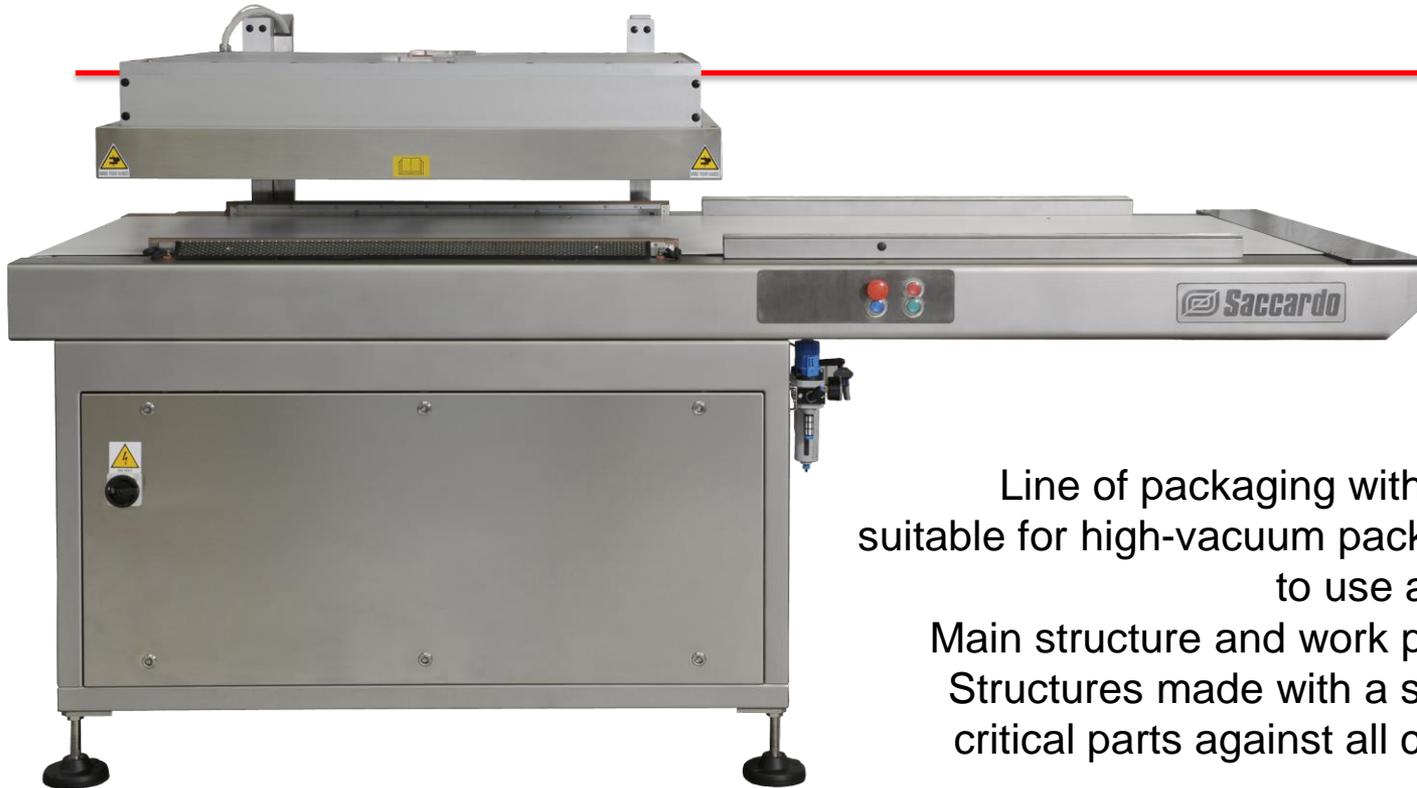

ITALIAN **HEART** OF VACUUM PACKING MACHINE

ITALIAN **HEART** OF VACUUM PACKING MACHINE

Belt line DUBLINO

96 – 800 - 860
1000 - 1396

Line of packaging with fully automatic cycle, suitable for high-vacuum packaging of food. Simple to use and solid construction.

Main structure and work plan in **stainless steel**. Structures made with a system of protection of critical parts against all corrosive factors in the environment.

Ideal for the food industry.

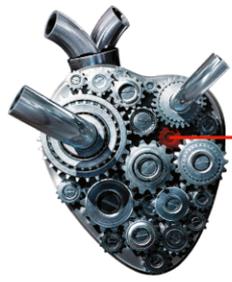

ITALIAN **HEART** OF VACUUM PACKING MACHINE

Line of shrink tunnel
immersion or shower

A complete range of products
created to satisfy all requests and
needs in the field of **immersion**
and **shower** shrink process.

ITALIAN **HEART** OF VACUUM PACKING MACHINE

Dryer line Automatic

DRYER 600
DRYER 800

Line of automatic dryers **specifically** studied to dry the packaged product after the shrink process.

Drying speed can be **set** from control panel.
Structure made entirely of stainless steel.
Construction design made for easy access and maintenance

ITALIAN **HEART** OF VACUUM PACKING MACHINE

All our machines can operate **separately**,
or in contexts of **complete production lines**

**Our mission: to produce machines and plants
highly reliable to increase productivity and reduce costs.**

We can do it thanks to the great competence and experience
in **50 years** of **Italian** history of Saccardo
