

Compac CPS Series with Barrel Lifting Attachment

The Compac CPS Series Stainless Steel Lifter and powered rotation Barrel Lifting Clamp Attachment has been designed to grip Barrels by the circumference, Lift and rotate to any position through 360° deg.

The Barrel Lifting attachments shaped clamping pads have been carefully designed to securely grip the barrels circumference without causing damage or deformation.

The clamping mechanism is operated manual through a hand wheel driven gearbox assembly, a built in slip torque limiter ensures the correct clamping pressure is applied avoiding over tightening.

The Barrel lifter has both powered lift and powered rotation operated by push button switches on the control by or an optional handheld remote unit.

Overview:-

- Powered Lift and Powered rotation to and position within 360° or Geared Rotation.
- Loads capacity up to 200kg.
- Interchangeable Jaws with shaped pads enable the right solution to be specified for each individual application.
- Suitable for load diameters of up to 850mm as standard.
- Gearbox driven clamping system with built in Slip Torque mechanism to ensure correct gripping pressure is applied preventing over tightening and damage to load.
